

Syabonga Njabulo Duma

Aspiring Software Developer

+27 72 434 7162 | njabulod189@gmail.com | Eastern Cape, PE | github.com/Syabonga-dev | linkedin.com/in/syabonga-njabulo-duma

PROFESSIONAL SUMMARY

Final-year Diploma in Information Technology (Software Development) student at Nelson Mandela University, with a strong academic record (79%–77% averages). Passionate about building practical, user-focused applications across web and AI domains. Experienced in full-stack development with a proven track record of delivering real-world software projects. Actively seeking an entry-level software developer role to grow and contribute.

PROJECTS

PhilaLink Health Services

React · C# · ASP.NET · Anthropic Claude API · OpenWeather API
A health platform connecting nurses, proxies, and patients to streamline medication collection. Features Phila Chatbot — an AI-powered self-diagnosis assistant that recommends over-the-counter medication based on age and allergies, and delivers location-aware health tips via the OpenWeather API (e.g. 'Rain expected in 5 hours — dress warmly').

CivicAlert

HTML · CSS · C# · ASP.NET
A community crime-reporting platform allowing citizens to report incidents in their area in real time. Enables residents to submit, track, and monitor crime reports with location tagging, helping communities and authorities identify patterns and respond faster.

SAPS CaseVault

HTML · CSS · C# · ASP.NET
A role-based case management system for the South African Police Service. Officers open cases, station commanders assign them to detectives, and only a station commander or station commander can close a case. Eliminates disappearing dockets through a tamper-proof audit log that records every action, timestamp, and responsible officer.

WORK EXPERIENCE

Shop Keeper

Gobisiqolo Traders, Ladysmith | Dec 2022 – Feb 2024

- Managed daily store operations including sales, customer service, and stock control.
- Maintained accurate inventory records and ensured consistent product availability.
- Handled cash transactions responsibly and maintained an organised store environment.

EDUCATION

Diploma in Information Technology
